Education

Vellore Institute of Technology

Bachelors of Technology in Computer Science and Engineering

2021 - 2025

CGPA 8.4/10.00

St. Anselm's Sr. Sec. School

2021

SSLC : 93.2%

HSC : 85.6%

Experience

Chief Product Officer

January 2024 – Present

BlindMe & Inosway

Turkey - Remote

- Led the full development of BlindMe's dating app using Flutter and Firebase, building features like authentication, profile management, matching algorithms, and real-time interactions, ensuring cross-platform compatibility.
- Directed Inosway's travel website project, providing strategic guidance on technology choices (React, Appwrite) and managing the development process.
- Designed cloud-native, highly available infrastructure and implemented continuous monitoring and alerting systems for both platforms to ensure scalability and reliability.

Flutter Engineer and Advisor

December 2023 – February 2024

Edventures

Sweden - Remote

- Lead Flutter Engineer and Advisor, driving app development and integrating Appwrite backend with AI chatbots.
- Guiding the tech team in web and mobile projects, with a focus on UX design and expertise in Dart, Flutter, Appwrite, AI integration, and Git.
- Spearheaded the development of a web app facilitating AI chatbot interactions, user profile management, and password management. Implemented user flow tracking for continuous app improvement.

Front End Developer Intern

June 2023 – August 2023

Clinigo

Vellore - Remote

- Developed Flutter mobile applications, implementing BLoC state management and integrating RESTful APIs.
- Architected app state management using the BLoC pattern, enhancing predictability and business logic separation.

Certifications

AWS Solution Architect  Certificate

February 2024

AWS Cloud Practitioner  Certificate

January 2024

IBM DevOps, Cloud, and Agile Foundations  Certificate

April 2023

Projects

Resilient Microservices Arch | Python, Flask, Docker, Prometheus, Fluentd, Chaos Engineering| August 2024

- Developed two primary microservices: User Service and Order Service, with a dashboard for real-time monitoring.
- Implemented fault tolerance with Circuit Breaker (pybreaker) and retry mechanisms.
- Utilized Docker for containerization and set up Fluentd for log collection, along with Prometheus for monitoring and custom metrics.
- Incorporated chaos testing and health check scripts to simulate system failures and measure system resilience.

Lenk - AI-Integrated Chat Application | Flutter, Firebase, Git, React| June 2024

- Developed a chat application with AI-driven sentiment analysis to suggest replies and analyze user emotions, enhancing user engagement.
- Built a responsive and user-friendly chat interface using Flutter, enabling cross-platform support for Android and iOS.
- Implemented real-time messaging using Firebase Firestore for fast and smooth communication.
- Integrated user authentication with Firebase Authentication, allowing secure login and account management.

Other Projects | Go, Swift, Flutter, React, etc. |

- [Portfolio Website](#) — [Github User Search App](#) — [iOS Weather App](#) — [Go - Web Sockets Chat](#)

Responsibilities

Technical Head : SOFT COMPUTING RESEARCH SOCIETY

January 2024 - present

Technical Skills

Development : Full-stack Web Development, Mobile App Development (iOS, Android), DevOps, Cloud Architecture, Project Management, System Design

Languages : Python, Dart, Swift, Go, C++, SQL, Bash, JavaScript

Technologies & Tools : Flutter, React, Appwrite, AWS, Docker, Kubernetes, Jenkins, Git, CI/CD, Postman, Figma, Linux
